## **INVENTORY MANAGEMENT MODULE**

Lab inventory management allows you to keep track of stock levels across your lab during all inventory cycle stages to make sure that you never run out of needed materials or ingredients. On top of that, it prevents overstocking and understocking by analysing and forecasting demand based on ingredient consumption.

ventory / Dash	board							🔤 Enj	glish (U

## **DOCUMENT MANAGEMENT MODULE**

An efficient laboratory document control system is essential for the lab to keep records of all processes in place and documents always up-to-date. Laboratories must have complete control over their documents and protocols to ensure the quality standard of the organization.

### **SAMPLE MANAGEMENT MODULE**

Sample Tracking made up of the selection, collection, storage and retrieval of samples and their relevant data. Sample tracking helps laboratories know where samples are in the testing process. If additional tests are ordered, sample tracking allows the laboratory to rapidly identify the patient information and any previous testing carried out on the sample.
